

## Eesti psühholoogia laias maailmas aastal 2006

Varsti saab kümme aastat sellest, milla ma hakkasin Eesti psühholoogia raamatupidajaks. Ja mida muud võibki oodata sellisest püsivusest, kui uut ülevaadet sellest, kuidas Eesti psühholoogia 2006. aastal maailmas välja paistis andmebaasi *PsycINFO* pilgu läbi. Koos teiste erialade abiga ilmus Eesti autorlusega kokku 50 artiklit. Kui keegi juhtub võrdlema 2005. aasta graafikut, siis näeb, et ka paari eelmise aasta arvud on veidi kosunud. *PsycINFO* on üsna aeglane ja mõnikord kulub mitu aastat enne, kui kanne andmebaasi tekib. Pole võimatu, et 2006. aastale lisandub ajage veel mõni töö. Seega on vähemalt selge, et neli aastat järjest on õnnestunud avaldada üle poolesaja artikli, millest vähemalt üks autor on seotud Eestiga.

**Joonis 1.** Eesti autorlusega artiklite arv *PsycINFO* andmebaasis 1990-2006.

Kuidas Eesti psühholoogia siis 2006. aastal välja näeb? Kõige suurema mõjukusega tööd ilmusid teaduse tippajakirjades: Maarike Harro kardiovaskulaarsest riskist lastel ajakirjas *Lancet* (Andersen et al., 2006), Richard Villems India inimeste geneetilisest päritolust ajakirjas *PNAS* (Sahoo et al., 2006) ja Krista Kaasiku artikkel sellest, kuidas kestev pimedus reguleerib geenide ekspressiooni ajakirjas *Nature* (Zhang et al., 2006). Nagu karta võiski pole ükski nende autoritest psühholoog ja ega ka teemad otse psühholoogia alla kuulu. Teise asjana, mis silma torkab on paras kogus töid pedagoogilise sisuga ajakirjades nagu näiteks *Journal of Language, Identity, and Education* (Ehala & Niglas, 2006), *Instructional Science* (Pata et al., 2006), *Journal of Computer Assisted Learning* (Pedaste & Sarapuu, 2006a), *Interactive Learning Environments* (Pedaste & Sarapuu, 2006b) ja *International Journal of Bilingual Education and Bilingualism* (Ransdell et al., 2006). Näib, et kasvatusteadused hakkavad tasapisi varjusurmast ärkama. Tundub, et „päris” psühholoogia jääb üha enam vähemusse, kuid sündmuseks oli seegi, et Kenn Konstabeli ja Ann Virkuse töö sai ajakirja *European*

*Journal of Personality* aastapreemia doktoritöö põhjal valminud artiklite kategoorias (Konstabel & Virkus, 2006). Hea märk on kindlasti see, et autorite nimekirjas on päris noori psühholooge (Merle Nurmoja, Ann Virkus, Carolina Murd, Kätlin Peets, Liisa Raudsepp jt.)

Nii nagu mujal psühholoogias on kõige kindlam viis ennast nähtavaks teha uurides tervist või seda, kuidas alkohol, rohud või enesetapu mõtted seda mõjutavad (Harro et al., 2006; Kull, 2006; Kõlves, Värnik, Schneider et al., 2006; Kõlves, Värnik, Tooding et al., 2006; Lang et al., 2006; Põlluste et al., 2006; Vendt, 2006; Vendt et al., 2006; Õun et al., 2006; Ööpik et al., 2006).

Kokkuvõte võiks olla selline: täiesti normaalne aasta!

Jüri Allik
